

Dear Eric,

Four months ago, I entered your office for pain Mgt. therapy - I was very pessimistic because I had had prior back treatment & no positive results. I was in severe pain, had a hard time walking & obviously depressed over my condition.

In the beginning, the massage treatments - later, the gentle exercises and then the advanced ones as I progressed, have me now leading a fairly normal life. After ~~half~~^{many} years of pain I now have very little discomfort (operation for herniated discs was my only option). I do your recommended exercises because I have found great relief to my pain.

Eric, your knowledge of my treatment, your positive attitude toward me & the capacity to challenge me has helped lead to my recovery. I can't begin to thank you for giving me back my life. Thank you and your entire staff. Please
